

Me, Myself & Science Desk Name Cards

What you need:

-  Color paper (Your class color)
-  Your photo from home
-  Colored pencils
-  Formatting/Design example

How to make your name card

-  Fold the paper like a hot dog bun (long ways)
-  The fold goes at the top
-  The open end is what will sit on the desk

On the Front Side

-  a picture (or two) of yourself (no more than a year old!)
-  You'll write your name and some history & special things about you!
-  embellishments: stickers, magazine cutouts, clip art, odds & ends, etc. are great!

Front side Design

My Favorites:

Music: varies... love the oldies (60-70-80's) rock: Queen, Nirvana, Guns & Roses, classical & Hawaiian music, country: Tobey Keith, Garth Brooks, Brad Paisley TV: CSI, (Las Vegas), NCIS, (miss Gilmore Girls, X-Files, Friday Night Lights) Movies: Star Wars, Remember the Titans, Dr. Zivago, Sabrina, Replacements, Legally Blonde Books: Harry Potter, Left Behind, anything by Dan Brown Food: Pizza, Mexican food, sushi, broccoli beef, green bean chicken Hobbies: Photography & football...plus web page creation School Subject: Science, TV/radio production, photography

Why is science helpful to society?

Science offers us so much! Technology is powerful. In medicine, we now have heart and brain surgery occurring every day all over the world. I hope one day that a cure for pancreatic cancer will be found, and expect that it will. I hope to see man walk on the moon again. The science fiction of yesterday is now science reality of today. The fact that I am typing this on my computer, and plugging in my digital photos is amazing!

Why is science helpful to me?

I can talk to my Bill on the computer, and see him when we talk through the web cam even though he's 2,000+ miles away. I can talk to my sons Brandon & Josh through our cell phones and via email. My car, which I love, has an engine that is powerful yet conserves gas-while looking REAL good!! I microwave food, bake in my convection oven. I use medicine to keep me healthy, and see very talented doctors when I am sick.

My TV & DVD player can show me news from around the world or chick-flicks that make me cry! I wear clothing that is synthetic (man made material) that is cool & comfortable. I can fly on airplanes anywhere in the world. My amazing camera is able to take 1000 photos on a "card" that is about the size of a quarter, and with a lens that can see a football player who's 75 yards away. But why is science really helpful?

It allows me to share an incredible subject with students that I enjoy seeing and being with, now and for many years to come!

You have JUST this period to finish

- Just a reminder For tomorrow: Don't forget:

 Pd 1: the 1st day packet

- ALL classes:

 your parent/student information page

 extra credit popcorn

 Don't forget to email me (your parents too!!) if you didn't yesterday!
